BPCOATCR

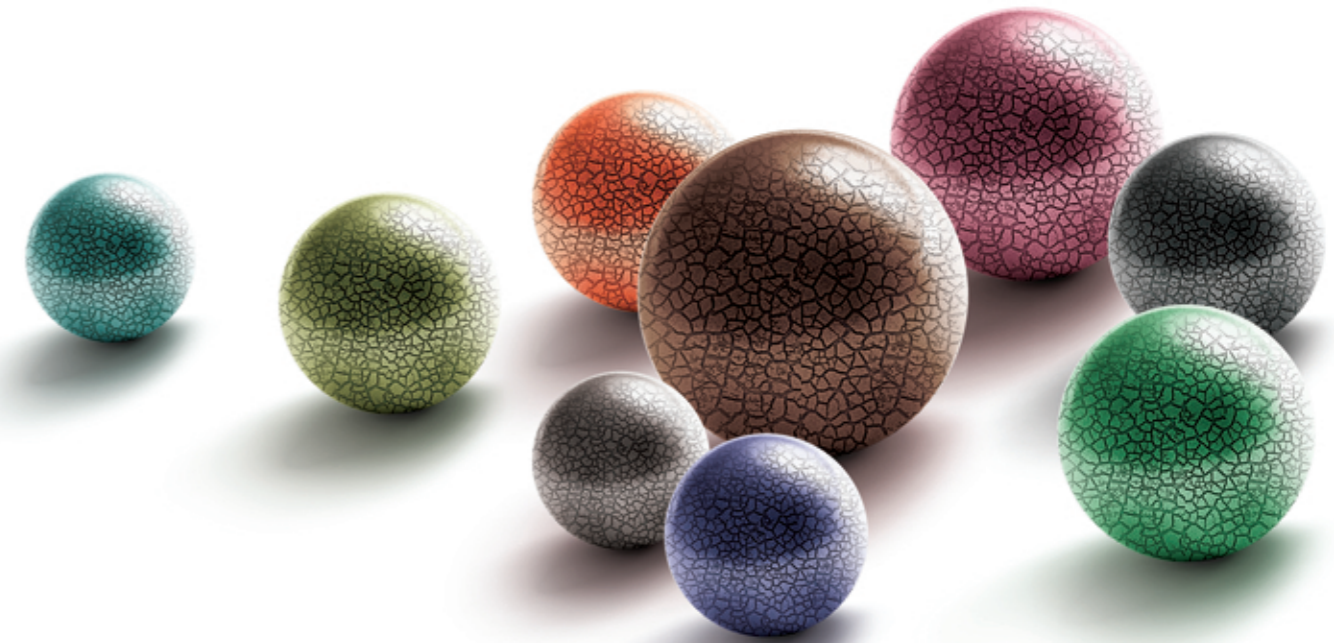

Crocodile Effect

Unlimited powder coatings...

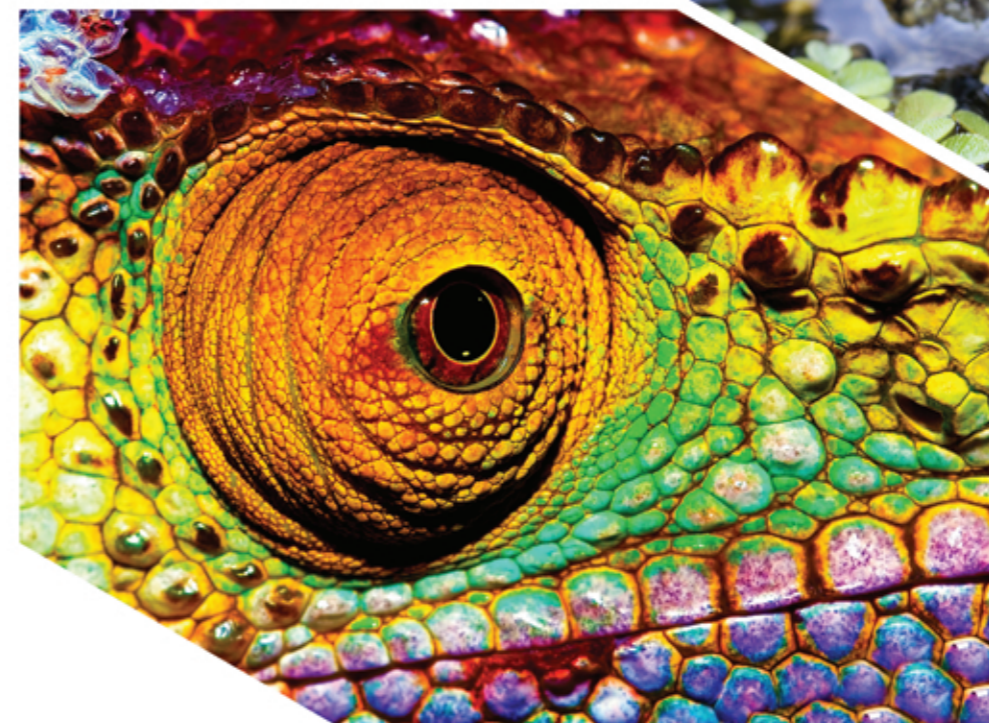

BPCOAT-CR Series is a thermosetting powder coatings based on polyurethane resins. The coating provides a wide range of performance properties with excellent resistance to impact, abrasion and It also has high UV and chemical resistance. This series can be used for interior and exterior applications.

Nowadays, the use of special-effect powder coatings is rapidly gaining popularity and importance area as aesthetic appearance is so important to users. BPC makes perfect finishes what you exactly want with the better performance qualities. Our product can consistently create a perfect crocodile skin which is one of the latest trends and effects in decorative and protective Powder Coatings. Varying the film thickness will change the size of structure from large cracking to the narrow which resembles the skin of crocodile.
