BPCOATSF

Soft Feeling

BPCOAT-SF Series, are thermoset powder coatings that provide soft feeling that are ideal for surfaces needing that special touch. Soft-feel coatings have tactile properties, are mainly matte, and both look and feel similar to leather or velvet. These coatings are offering superior weathering and chemical resistance.

Silky surfaces..

Technical Properties		
Tests Done	Units(Methods)	Value
Surface Appearance	-----	Smooth-Mat
Specific Gravity	(EN ISO 8130-3)	1,3-1,5 (Based on Color/Gloss)
Gloss	(EN ISO 2813 60 °)	3-10
Cupping Test	(EN ISO 1520),mm	8mm
Hardness	Buchholz (EN ISO 2815)	1,7 mm(>59)
Pencil Hardness	-	4H
Adhesion	(EN ISO 2409)	Excellent. Gt = 0
Recommended Film Thickness	microns	75-85

- Features;**
- Soft touch feeling
 - Available in a wide range of colors
 - Indoor and outdoor use
 - Over-bake resistance
 - High corrosion resistance and outstanding durability

- Application Area;**
- Furniture
 - Window frames
 - Electronics
 - Home appliances
 - Any product needing that special touch
