BPCOAT AG Series

Anti-Graffiti

Long-term protection against graffiti and vandalism

BPCOAT-AG Series, are thermosetting polyurethane based powder coating used for protection of surfaces against graffiti.

Graffiti is a kind of vandalism using materials such as spray paints, permanent markers and dyes that damaging surface properties which can be very costly to clean. Repeated cleanings of graffiti from surfaces can result in considerable long-term damage to the substrate. For that reason, anti-graffiti applications on surfaces has become extremely important.

This series can be used for the reduction of maintenance costs that result from graffiti by easily cleaning of most kind of graffiti. Thereby, we ensure the appearance of powder coated surfaces are maintained even after numerous cleaning cycles.

Features

- Resistance to graffiti (can be easily cleaned)
- Resistance to most of solvents
- High mechanical properties (impact resistance, scratch resistance)
- Excellent weather resistance
- Reduces maintenance costs
- Can be used as single-coat or second layer as varnish
- Available in almost all shades and with a smooth-flow or wrinkle-texture, glossy or semi-glossy surface finish

It will be more difficult to clean wrinkle or texture surfaces than smooth. Therefore, we propose to consumers to use smooth powder coating.

Application Area

- Transportation components (train, bus and stops)
- Phone boxes
- Advertising boards
- Road sign panels
- Playground equipments
